Company background

STGI Technologies and Consulting Private Limited is the Indian subsidiary of Summit Technology Group. We are Bankers, Cloud Engineers, and Technologists. Our business helps organizations execute progressive operational and technology strategies. We believe that these strategies should leverage modern public cloud platforms and automation capabilities.

Job Title: Robotic Process Automation (RPA) Engineer

Job Description:

At STGi, we are building products for the Financial Institutions - specifically for US market. We are seeking a skilled Robotic Process Automation (RPA) Developer to design, develop, and implement automated solutions using Blue Prism and UiPath. As part of our team, you will play a critical role in streamlining business processes and improving operational efficiency by leveraging RPA technologies. This role offers an excellent opportunity for freshers to gain valuable experience as RPA developer within a supportive and collaborative environment.

Responsibilities:

Analyze business processes and identify opportunities for automation.
Design, develop, test, and deploy RPA solutions using Blue Prism and UiPath platforms.
Collaborate with business analysts and process owners to ensure automation solutions align with business goals.
Troubleshoot and resolve issues in automation processes, ensuring minimal downtime.
Optimize and maintain existing RPA solutions to improve performance and scalability.
Create and maintain documentation for RPA solutions, including process workflows and technical designs.
Stay updated on the latest RPA trends and best practices to enhance the automation framework.
Provide training and support to end-users and other team members on RPA tools and solutions.
Contribute to the continuous improvement of development processes and practices.
Shepherd productions issues to a swift resolution and perform Root Cause Analysis when issues arise, collaborating with Support team to resolve.
Establish and maintain strong relationships across teams and with colleagues and clients.
Help promote a company culture that encourages top performance and high morale.

Requirements:

Hands-on experience with Blue Prism and/or UiPath for designing and developing RPA solutions.
Strong understanding of process automation, workflow design, and scripting.
Familiarity with programming languages such as C++, Java, VB.NET, or Python.
Proficiency in using tools like SQL for data integration and manipulation.
Ability to analyze and model business processes to identify automation opportunities.
Ability to manage multiple projects simultaneously and meet deadlines.
Excellent communication and interpersonal skills to effectively work with diverse teams.
Ability to work collaboratively in a team environment.
Excellent problem-solving and communication skills.
Eagerness to learn and grow as a Implementation Engineer.

Preferred Qualifications (not required but considered a plus):

Experience with version control systems such as Git.
Familiarity with backend technologies such as Python/ NodeJs / C++ / Java.
Understanding of software development methodologies like Agile or Scrum.

Qualities Needed for Success:
Coachable
High energy
Sense of ownership
Passionate about software development, particularly in design
Appreciation for quality and continuous improvement
Collaborative and adaptable

This is an entry-level position ideal for recent graduates or individuals looking to kick-start their career as an RPA Engineer. We offer a supportive work environment, opportunities for skill development, and the chance to work on exciting projects that make a real-world impact. If you are passionate about coding and eager to learn, we encourage you to apply and join our team!
